

Simplicity

WebDollar (WEBD) is a cryptocurrency fully native to the World Wide Web, built around the concepts of simplicity, lightness and portability.

In order to encourage the mainstream adoption of cryptocurrency, we need to address all kinds of users. For that, we've created the simplest possible user experience for a cryptocurrency.

Mining

- CPU mining
- ASIC resistant
- GPU unfriendly

33,(3)% POW

66,(6)% **POS**

Extremely Easy To Use

Just visit WebDollar.io and you can start mining directly on the site, from any device, almost immediately.

- No Installations No Downloads
- No account creation or complicated configurations. · Wallet is safely created automatically and
- stored locally

Referral System

Referral system gives the possibility for miners with less hashing power to have the same revenue of a miner with higher hashing power. You can create a referral link for joining the pool you are mining in, the miners who joined the mining pool with the link will share a small percentage of their revenue with you.
